

Abstract

A double sleeve shrinkable label inserting machine includes a station, a shrink film conveying device, a guiding device, a cutter device, a tuning device, a thermosetting
5 device and two rotary wheels. The guiding device and cutter device may be adjusted rapidly according to the shape and size of two identical or different package goods to wrap a shrink film sleeve on the package goods, and the thermosetting device can bond the shrink film sleeve neatly to
10 the package goods.
